

Charm 27

With the hull designed by C. Raymond Hunt Associates of the USA, and the deck designed by the award winning Gloss Design of Italy, the Charm 27 is a blend between style, space and sportiness. Truly unique designs that incorporate the latest in electronics and drive systems with inspired solutions that allow each of these boats to deliver class leading space usage while maintaining Emocean Marine's core values such as the high performance and exceptionally dry and smooth ride.

A Charm packs a massive array of amenities that are unique to boats of its size, such as the worlds smallest marine generators and powerful air-conditioning systems, the full functioning galley and full size enclosed showers and bathrooms. It is no wonder that Charms are labeled pocket Yachts.

MAKE WAVES!

made in Abu Dhabi

"Instead of leaping like a lamb, she puts her head down and charges like a bull – and for the best part, the waves tend to submit!"
(Sport Boat and Rib – December 2010)

Specifications
